CLAMPS MODEL MULTI

[inches] mm Weight: 20 kg / 44 Lb Capacity: 200 kg / 441 Lb

DIMENSION CLOSED
FOR (49,9) In 1267 Open

(63,05) In, 1600 mm ON REQUEST

DESCRIPTION:

- ✓ MULTI clamps have been designed to perform all weight management tasks in the apiary.
- ✓ Its vertical arms provide comfort and ergonomics.
- ✓ MULTI clamps are adjustable in height and width to adapt to all hives on the market.
- ✓ **Multi clamps are delivered as seen in the image above, optional accessories are explained in this document and must be selected in the order form.**
- ✓ From the clamp bars, in all their height you have the control of the most important functions. Up fast, Down fast, Up slow, Down slow, Brake, Unbrake, and Level.
- ✓ *We have given the maximum possible height for his load capacity. But we know that there are customers who prefer it with less height, but retaining the model's properties. For this reason it is possible to reduce its height easily just by cutting the vertical arms.*

(indicate on the order form if you want that we make this reduction)

USES:

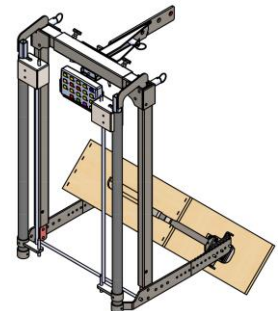

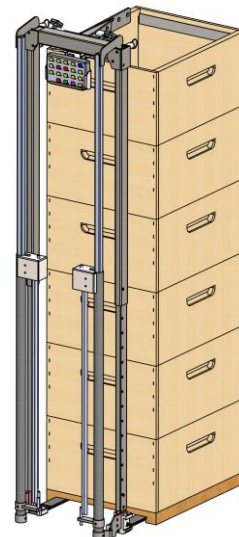

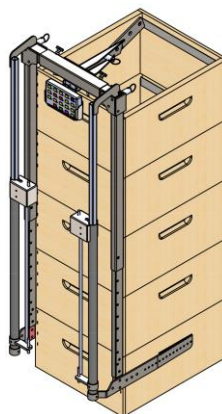

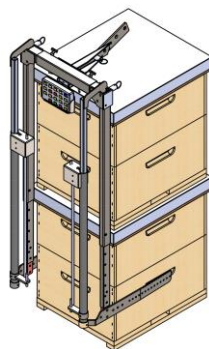

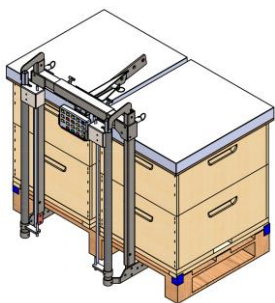

On pallet

Flat Hives

Column Stand. Arms
In (49,9) 1267 mm

Column B-L Arms
In (63,05) 1600 mm

Harvest Supers

- Fixed right arm at 90°.
- Left arm oscillating, can be limited.
- Adjustable vertical and horizontal distance.

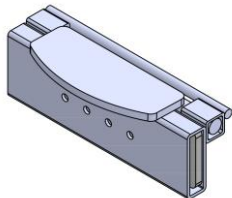

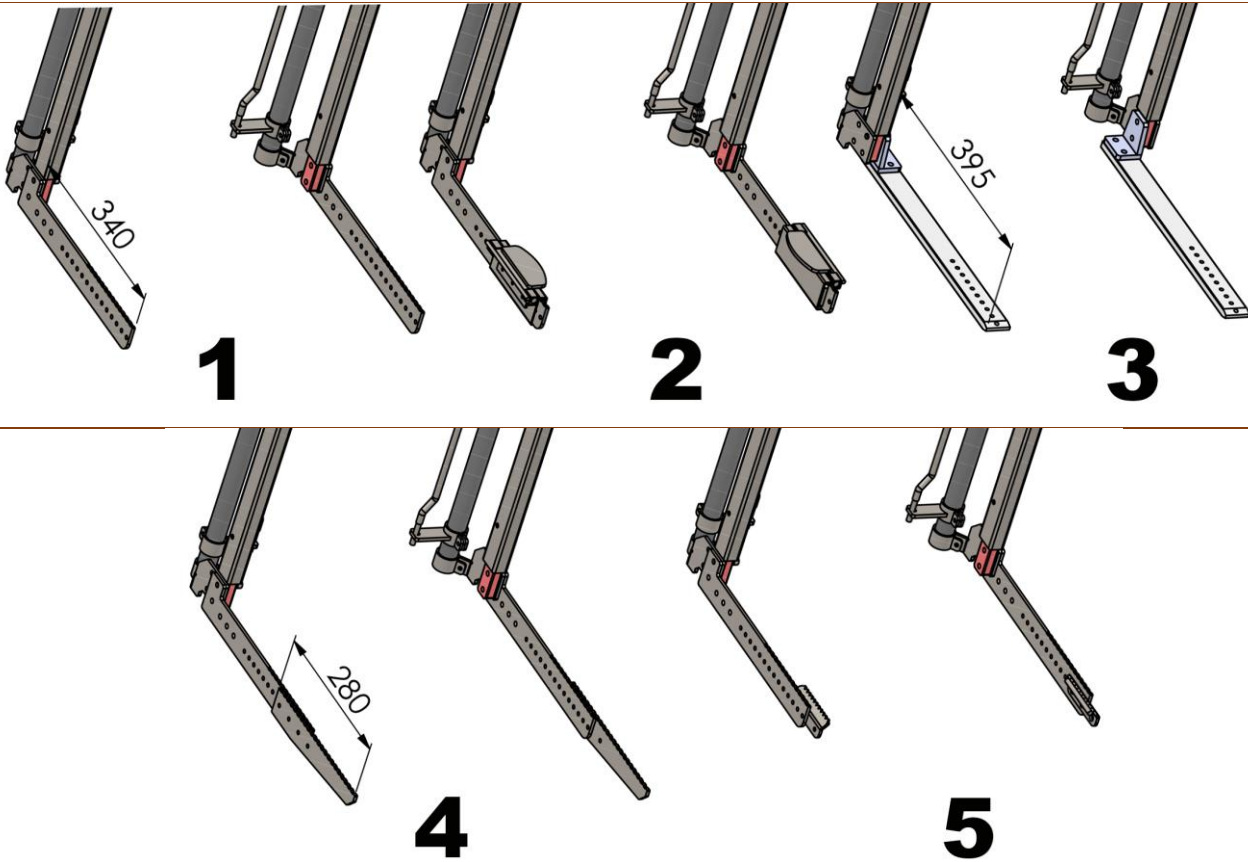

DETAILS:

- 5 main functions in the tactile rods.
- Security press.
- Oscillation of the press are lockable.

WITH STANDARD FORKS: (1)

With the arms delivered as standard, the clamps can be configured with the options as shown in the images.

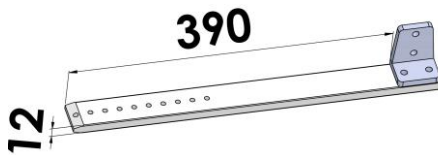

FLAT SYSTEM: (2)

To lift hives, supers or supers pile.

The arms work at a fixed distance, the plates are raised alone when touching the rise and position themselves to coincide with the hollow of the hands.

VALID: Multi

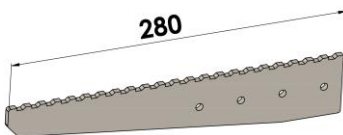

B-L SYSTEM: (3)

This system allows to mount horizontal arms to catch hives from the bottom.

A set screw presses each arm to prevent.

If you order the B-L system, you will also receive the standard arms.

VALID: Multi

EXTENSION OF THE STANDARD ARMS: (4)

Select these parts if you use iron pallets and the Standard arms do not reach the pallet rails. The wooden pallets have boards in the middle that are sufficient to support and balance the load without extension, with the clamp press, arms as long as the hive are not necessary.

VALID: Multi, NV, V.

GR SYSTEM: (5)

They can be installed directly on the arms. To lift hives, supers or supers pile.

The left arm must be unlocked to work like a clamp.

The round piece allows the assembly to slide until it finds the hand hole,

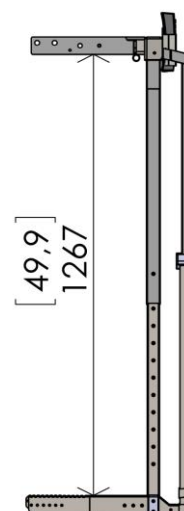

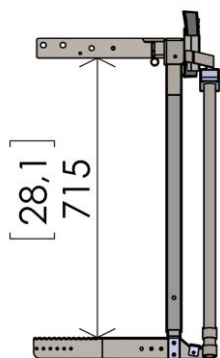

then the serrated piece makes a firm grip.

VALID: Multi, NV, V.
